

Nexi Chain

Enriched gateway to
multichain democratization

Nexi is:

A high-tech enabled
blockchain ecosystem to
boost liquidity on chains
and ease decentralized
applications development
through an inter-connected
gateway fetched to a super
chain.

Market Needs

\$160B+

The blockchains market was valued at USD 4.67 billion in 2021 and is projected to grow from USD 7.18 billion in 2022 to USD 163.83 billion by 2029, exhibiting a CAGR of 56.3% during the forecast period.

Focused Features

Scalable with EVM-Chains

Exclusive liquidity offerings via
side and super chain networks

Cross-chain bridges to supply
liquidity on multiple networks

Low-Carbon economy and almost
zero-fees DApps development
utilities

Create Our Utopia

Major cross
liquidity offerings
through L2 chains
and DeFi
launchpads

Faster and wider
transactions
through the
super-chain's
master nodes

To pay less gas
fees against more
optimized
transactions and
validation

Innovative Approach

**Direct super-chain and side-chain integrations
and bridge**

**Staking/rewards/gas token separation to
divide the network's promotion**

**Liquidity offerings through both super and
side chains simultaneously**

Trend Analysis

1000%

Desired and expected annual
rate of liquidity and value
locked over the Nexi chain

AUM: Assets Under Management
TMC: Total Market Capital
TVL: Total Value Locked
CLO: Cross Liquidity Offerings
(Amounts in Million USD)

Executive Roadmap

Q1 2023:
Testnet
integration,
initial
validators
setup

Q2 2023: Migrate to the Mainnet,
validators and rewards assignment,
Super-chain development, Side-chain
liquidity resource management,
Ledger development, Cross-chain
bridges to EVM chains

Q3 2023:
Side-chains acceleration, NFTs
integration, AI-backed DApps
integration, 100+ validators on
the chain, Wallet development

Q4 2023: Over \$1b total value locked plus
\$50m grants for development, 100+ granted
initiatives in the chain's ecosystem

Highlights

One super chain and unlimited side chains to manage and optimize liquidity on parallel chains

Available to migrate smart contracts and DApps from EVM customizable chains for duplicate pipelines and sources of liquidity without paying extra gas

From super chain to side chains cross-bridge for internal and external coverage of liquidity and assets management

Intra-network staking delegation and rewards distribution among validators by using the most innovative approach of smart contracts integration

Strategy

- A** Exclusive super-chain deployment to optimize and manage an accelerated DPOS mechanism
- B** Multi-channel liquidity offerings through side-chains connected to the main network
- C** Exclusive and customizable AI-backed scripts to navigate and enhance the performance and scalability of the chain

Ecosystem

- A** Cross-chain tokenized assets:
Available to deploy and/or migrate
any type of tokens on super-chain
- B** Cross liquidity offerings through
powerful AMMs connected to the
super chain and side chains
- C** Parallel uncapped NFT
marketplaces to be connected to
either super chain or side chains
