NEXI CHAIN

NEXI AT A GLANCE

As the first layered interconnected L1 chain, Nexi aims to play a vital and key role in developing and accelerating EVM networks and protocols to gain the highest optimization and control the fees on the main network for leveraging the applications' usage and dissemination in a decentralized and permissionless manner.

NEXI CHAIN

INTERCONNECTED VALIDATION

Nexi aims to use an interconnected validation process to make a more secure and reliable network for sustaining the chain's performance. Using this model allows the chain's users and stakeholders to pass the smart contracts through two internal and external validation layers without paying extra validation or gas fees.

HIGHLY- SCALABLE DEVELOPMENT

01

Easy-to-integrate platform through EVM-supported machines and development environments without cross-functional proxies

02

Ability to deploy native smart contracts or migrate any EVM-supported smart contract types from other L1 or L2 networks

NEXI CHAIN

OUR VISION

01

To accelerate and expand ecosystems development for builders and white-label dApp solution providers

02

To allocate supportive native grants for development and raise cross-chain development opportunities

03

To promote highly-capable local hubs and communities in various sectors of decentralization

OUR INNOVATION

01

Layered interconnected validation to provide a more secure and scalable validation and development environment

02

Parallel and step-based validation and approval on the chain to increase the efficiency of transactions on the chain

NEXI CHAIN

OUR ACTION PLAN

01

Exclusive internal and external staking launchpads to provide generative rewards for the chain's delegators and active stakeholders

02

Constant and maximized incentives for the chain's active validators and node runners

03

Grants and initial liquidity offerings for 100+ initiatives on various sectors to promote the ecosystem rapidly

OUR ROADMAP

01

Phase 1: Foundation and interconnectivity (2022-2023)

02

Phase 2: Scalability and performance (Q1 2023- Q1 2024)

03

Phase 3: Adoption and mainstream integration (Q2 2024- Q4 2024)

04

Phase 4: Continuous innovation and evolution (Q1 2025 & beyond)

NEXI CHAIN

PORTFOLIO

Nexi is a full-inclusive network to host dApps, DeFi utilities, RWA tokenization initiatives and NFTs using both simple and mixed ERC contract modules.
